

Northern Tier Regional Road Safety Review Questionnaire July 2010

The Northern Tier Regional Planning and Development Commission (NTRPDC) is conducting a study to determine where the most significant safety concerns are located within their five county region (Tioga, Bradford, Sullivan, Susquehanna, and Wyoming Counties). Larson Design Group (LDG), in conjunction with the NTRPDC, Pennsylvania Department of Transportation (PennDOT), and Federal Highway Administration (FHWA) is collecting data for the study. LDG, NTRPDC, PennDOT, and FHWA will determine the most significant locations of concern based on the questionnaire results received from community leaders and representatives such as yourself. Locations of concern can range from a single intersection to a 10 mile roadway corridor. Locations of concern can be anything from roadways and railways to bicycle and pedestrian paths. They can be current issues or potential future issues that may arise due to anticipated growth, land development, or changing travel patterns.

Please take time to fill out this questionnaire and to give us the feedback that you think is most important, so that the NTRPDC can ensure that the locations of concern in our five county region that are in the most serious need can receive the attention that they deserve. When you have completed the form and/or illustrated your locations of choice on the enclosed county map, please return them via the self addressed postage paid envelope provided no later than August 20, 2010. If you have concerns in another county and would like a map of that county for illustration, please contact Max B. Inkrote, P.E, Project Manager at Larson Design Group, at (570) 323-6603 or via email at mbi@larsondesigngroup.com. If you prefer, you can complete the questionnaire online at www.northerntier.org. We greatly appreciate your assistance in this process and your service to the NTRPDC community. The NTRPDC hopes to have the list of the most significant concerns posted on their website www.northerntier.org by early 2011.

Name _____
 Title or Position _____
 Contact Information:
 Address: _____

 City: _____, PA Zip Code _____
 Email: _____ Phone _____

PART 1: Identify a maximum of the five most significant critical safety concerns within the five-county Northern Tier area (in order of priority) and provide the location of each (show on map provided or describe below). You do not have to list five locations of concern. List only what you feel should be on the list. If you feel there are no locations, please check the box. Please note that not all locations that are listed by recipients will make it to the top list of concerns.

No Safety Concerns

1. Facility or Road Name _____
 (from _____ to _____)
 Township/Borough and County _____

2. Facility or Road Name _____
 (from _____ to _____)
 Township/Borough and County _____

3. Facility or Road Name _____
(from _____ to _____)

Township/Borough and County _____

4. Facility or Road Name _____
(from _____ to _____)

Township/Borough and County _____

5. Facility or Road Name _____
(from _____ to _____)

Township/Borough and County _____

PART 2: Give a brief description of the specific nature of your safety concerns at the locations you listed above. List the problems as you see them and/or provide recommendations for potential solutions to these issues. Add additional sheets if necessary. Feel free to draw sketches on the back of this form or include photos. If you have any supporting data or documentation of unreported accidents please include it.
